ALLISON SALZ | QMI AGENCY

EDMONTON -- The body of an Edmonton man, who disappeared when he slipped off a rock into the water below in Mexico late last week, has been found.

Kelly Callin, 32, disappeared Thursday afternoon, shortly after he arrived in Mexico.

It's believed he was watching his friend surf when he slipped on a rock and fell into the water.

The search was briefly called off Saturday due to poor ocean conditions, but his body was recovered sometime Sunday.

Callin leaves behind a wife. The pair were due to mark their one-year wedding anniversary July 14.

On Friday, Foreign Affairs confirmed that Canadian consular officials in Mexico were in contact with local authorities, as well as providing assistance to family members.

Callin was also a founding member of the band The Soulciters. The remaining members posted a note to their Facebook page Sunday afternoon.

"Never have we known such a compassionate, sincere, loving and caring person," read the post.

"You will be truly missed every day and we know your soul will always be with us. See you on the other side brother. We love you so much."

Callin is the latest Edmontonian to perish on Mexican soil. In January, Chris Rogers, 21, died after he fell from a second-storey balcony at a Mexican resort.

Rogers, a University of Alberta student, had been drinking before he fell from the balcony to the pool deck below.
